## Nutrient Management Plan (NMP) and CAFO Permit Application Checklist for SOPC00000

Facility Name:	 Form Completed by:		
Name of Owner:			

			Citatio	n of Rec	quirements in CNM	P/ NMP
SOPC Requirements*			Completed by producer or TSP		FOR TDA USE ONLY	
Required Element	Permit Page #	Citation	Item Addressed in (C)NMP on Page #	Initials	Comments	Completed (Yes/ No)
Notice of Intent (NOI) form	4	1.6.1				
Declarations Page, which addresses the						
following items: Prevents direct contact of confined animals with waters of the State.	8	3.1.e				
Ensures chemicals or other contaminants handled on-site are handled (including spill clean-up) and disposed of properly.	8, 10	3.1.f, 4.6.1.a, 4.6.1.c				
All sampling of soil and manure/litter is conducted according to protocols developed by UT Extension.	8	3.1.h				
A copy of the most recent nutrient management plan (NMP) will be kept as part of the farm records and will be maintained and implemented as written.	9	3.1.j				
If applicable, all waste directed to under-floor waste pits shall be composed entirely of wastewater (i.e., washwater, animal waste).	10	4.6.1.b				
Notify TDEC of any significant wildlife mortalities following land application of animal wastes.	10	4.6.1.d				
Address employee training for proper operation and maintenance of facility where employees are responsible for activites that relate to permit compliance.	10	4.6.1.e				
There shall be no land application of nutrients within 24 hours of a precipitation event that may cause runoff. The operator shall not land apply nutrients to frozen, flooded, or saturated soils.	12	4.6.2.f

Required Element	Permit Page #	Citation	Item Addressed in (C)NMP on Page #	Initials	Comments	Completed (Yes/ No)
Expected crop yields	15	5.2.h				
NMP addresses facility maintenance.	9	3.2.c				
Closure/rehabilitation plan for waste system storage/treatment structure(s) and mortalities that addresses facility maintenance until proper closure to be completed within 360 days.	5, 13-14	1.6.3, 4.9				
Includes field specific assessment of potential for N and P2O5 transport from field to surface waters. Must address form, source, amount, timing, and method of application of nutrients on each field to achieve realistic production goals (TN P Index must be provided for each field).	11	4.6.2.a.i				
Current manure/litter analysis for N and $P_2O_5$ (from within last year).	11	4.6.2.b				
Provide results of soil test conducted at a minimum of once every five years for all fields receiving manure, litter, or process wastewater.	11	4.6.2.b				
Applications of waste are no closer than 100 ft. to any down-gradient surface waters, open tile line intake structures, sinkholes, ag. wells, or other conduits to surface waters unless 100 ft. setback with a 35 ft. wide vegetated buffer is substituted or it is demonstrated that a setback/buffer is not needed due to use of alternate conservation practices or where field conditions would provide equivalent pollutant reductions.	11	4.6.2.d				
New CAFOs located adjacent to high quality stream (Exceptional TN waters) leave in place a 60-ft natural riparian buffer between stream and land application area.	12	4.6.2.e

Required Element	Permit Page #	Citation	Item Addressed in (C)NMP on Page #	Initials	Comments	Completed (Yes/ No)
Liquid Waste Management System Requir	ements					
Liquid waste management system must be designed to exclude all stormwater and must not contain any design allowances for a discharge.	12	4.7				
If liquid waste management system was constructed, modified, repaired, or placed in operation after April 13, 2006, it must meet or exceed NRCS FOTG standards. This should consist of pertinent engineered drawings (i.e. schematic of system) accompanied by a descriptive narrative.	12	4.7				
Any new or additional confinement buildings, waste containment/ treatment structures constructed after April 13, 2006 shall be located according to NRCS Practice Standard 313.	12	4.7.a				
If any earthen structures were constructed or modified after April 13, 2006, a subsurface investigation is provided.	12	4.7.b
